OBJECTIVE

Computer Science graduate from Unity University with strong knowledge in programming, software development, and problem-solving. Skilled in analyzing technical problems and developing efficient solutions using modern technologies. Interested in applying academic knowledge in a real-world professional environment. Seeking an opportunity to contribute to an organization's success through technical and analytical skills. Eager to gain practical experience in software development, IT support, or system analysis. Motivated to continuously learn and improve in the field of information technology. Committed to delivering quality work and supporting team objectives effectively.

EDUCATION

2026

- **Unity university**
Bachelor of science in computer science

SKILLS

- Web development: HTML, CSS, JavaScript
- Problem solving
- Microsoft office
- Teamwork and collaboration

PROJECTS

- **Online book publishing**
Designed and developed a web-based platform that enables authors to publish digital books and allows users to search, read, and download books online. The system includes secure user authentication, book management, category organization, and separate dashboards for Admin, Authors, and Readers. Developed using web technologies and database management systems to provide an efficient and user-friendly digital publishing experience
